Opioid Use, Overuse, and Abuse in Otolaryngology - E-Book Jun 17 2021 Prescription opioid abuse has become a major issue around the world, especially within the United States and Canada. Surgeons' high rate of opioid prescriptions places them in a critical position of working with patients to manage their pain.

Opioid Use, Overuse, and Abuse in Otolaryngology, edited by Dr. Ryan J. Li of

Oregon Health and Sciences University, takes a comprehensive, practical look at the national opioid epidemic and provides specific otolaryngology-specific data on chronic opioid usage. Discusses perioperative pain management in otolaryngology from an anesthesiology perspective, perioperative pain management in pediatric otolaryngology, rhinology and anterior skull base surgery, facial plastic and reconstructive surgery, neurotology, head and neck cancers, and more. Offers nonopioid analgesic options for otolaryngology-head and neck surgery patients and discusses a structured approach to perioperative pain management. Presents the knowledge and expertise of leading experts who have assembled the most up-to-date recommendations for opioid use, overuse, and abuse, including international pain management approaches. Covers the history of perioperative pain management in otolaryngology-head and neck surgery.

Use of Marine Fouling

Communities to Evaluate the Ecological Effects of

Pollution Apr 15 2021

The ecological consequences of pollution were evaluated by measuring the biological responses of marine fouling communities to increasing levels of pollution in San Diego Bay, California. Measurements of a gradient of increasing levels of copper and organotin compounds were made using anodic stripping voltammetry and inductively coupled plasma spectroscopy for copper and

hydride derivation with atomic spectroscopy detection for the organotin compounds

tributyltin (TBT), dibutyltin, and monobutyltin. The copper gradient increased by a factor of 4.2 and the TBT gradient increased by a factor of 8.75.

Differences in community structures were correlated with distinctly higher concentrations of toxic chemicals present at locations along the gradient. A portable microcosm system was used to study the community responses to different concentrations of TBT in controlled environments.

The microcosm study was inconclusive because there was very low settlement of fouling organisms in the microcosm tanks relative to their settlement and colonization in the bay.

Social Media and Politics in Central and Eastern Europe

May 05 2020

Social media are increasingly revolutionising the ways in which political communication works, and their importance for engaging citizens in politics and public affairs is well understood by political actors. This book surveys current developments in social media and politics in a range of Central and Eastern European countries, including Ukraine and Russia. It explores the process of adoption of social media by politicians, journalists and civic activists, examines the impact of the different social and cultural backgrounds of the countries studied, and discusses specific political situations, such as the 2012 protests in Moscow and the 2014 EuroMaidan events in Ukraine, where social media played an important role. The book concludes by addressing how the relationship between social media and politics is likely to develop and how it might affect the still relatively new democracies in the region.
