**Spatial Turns** Jan 23 2022 The phrase “spatial turns” signals the growing importance of space as an analytical as well as representational category for culture. The volume addresses such emerging modes of inquiry by bringing together, for the first time, essays that engage with spatial turns, spatiality, and the theoretical implications of both in the context of German culture, history, and theory. Migrating from fields like geography, urban studies, and architecture, the new centrality of space has transformed social-science fields as diverse as sociology, philosophy, and psychology. In cultural studies, productive analyses of space increasingly cut across the studies of literature, film, popular culture, and the visual arts. **Spatial Turns** brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin. The volume is organized in four sections: “Mapping Spaces” addresses cartography in all forms and in its intersection with culture; “Spaces of the Urban” takes up one of the key sites of spatial studies, the city; “Spaces of Encounter” considers how Germany has become a contact zone for multiple ethnicities; and “Visualized Spaces” concerns the theorization of space in film and new media studies.

*The Accidental Dictionary* Apr 25 2022 Brimming with hidden histories and tantalising twists, *The Accidental Dictionary* tells the extraordinary stories behind ordinary words. Our everyday language is full of surprises; its origins are stranger than you might think. Any word might be knocked and buffeted, subjected to twists and turns, expansions and contractions, happy and unhappy accidents. There are intriguing tales behind even the most familiar terms, and they can say as much about the present as they do the past. Busking, for instance, originally meant piracy. Grin meant to snarl. A bimbo was a man, nice meant ignorant, glamour was magic and a cupboard was a table... Focusing on 100 surprising threads in the evolution of English, *The Accidental Dictionary* reveals the etymological origins and quirky developments that have led to the meanings we take for granted today. It is a weird and wonderful journey into words. "A real delight ... hidden gems nestle on every page" -- JaffaReadsToo "The Accidental Dictionary is certainly worth adding [to a bookshelf]... I knew very few of these, which is a good thing, and now I know more, which is a better one" -- Marcus Berkmann, *Spectator* Christmas books 2016

**The Turns of Translation Studies** Jul 29 2022 What’s new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many “new” ideas actually go back well into the past, and the German Romantic Age proves to be the starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author’s aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.

*Blood Red Turns Dollar Green* Jan 29 2020 Professional wrestling meets Empire in a trilogy that *RollingStone.com* called “a one-of-a-kind literary offering for die-hard wrestling fans.” New York City, 1969. Danno Garland is a middling member of the National Wrestling Council, a secretive syndicate of pro-wrestling promoters. He’s kept his head down for fifteen years, but now he’s found a new heavyweight champion, Babu, and plans to use him to build a wrestling empire. Blocked, though, by the NWC, Danno makes a deal with Florida boss Proctor King to ensure Danno’s man will be the next title holder. In exchange, the belt will go to Proctor’s son, Gilbert, once he’s out of prison in a couple of years. But things don’t go according to plan, and now Danno is standing in a sold-out Shea Stadium on the night of biggest wrestling card of all time, and neither Babu nor Gilbert has shown up. Meanwhile, Lenny Long, Danno’s driver, is walking dazedly from the overturned van that was supposed to bring them to the venue, and the only sign of Gilbert is his foot. Across the country, Proctor nervously watches the show on TV, wondering why his screw-up of a son doesn’t already have the championship belt in his hands. It’s taken four years of pay-offs, double dealing, and bone-breaking to arrange this match, and if all that’s gone to waste, he might just have to take a business trip to New York. The “fake” world of professional wrestling is going to get very real. **TAKING TURNS** Nov 01 2022 I've never been afraid of the dark...but that doesn't mean I wanted to live in it. And maybe everyone wants what they can't have, but I should've thought it over before I accepted the key and unlocked the door to their forbidden world. Number One is mostly silent. He watches me with them very carefully. His gaze never wanders. His interest never wanes. Number Two is mostly gentle. But it's the other side of him I like best. The wild side. Number Three is mostly reserved. He refuses to cross the line. Even when I beg. It was carnal, it was sensual, and it was erotic. That's it. That's all it was supposed to be. A trip into the dark. A peek into the forbidden. I just didn't expect to like them.

**The Elements of Eloquence** May 15 2021 From the #1 international bestselling author of The Etymologicon and The Horologicon comes an education in the art of articulation, from the King James Bible to Katy Perry... From classic poetry to pop lyrics, from Charles Dickens to Dolly Parton, even from Jesus to James Bond, Mark Forsyth explains the secrets that make a phrase—such as “O Captain! My Captain!” or “To be or not to be”—memorable. In his inimitably entertaining and wonderfully witty style, he takes apart famous phrases and shows how you too can write like Shakespeare or quip like Oscar Wilde. Whether you’re aiming to achieve literary immortality or just hoping to deliver the perfect one-liner, The Elements of Eloquence proves that you don’t need to have anything important to say—you simply need to say it well. In an age unhealthily obsessed with the power of substance, this is a book that highlights the importance of style.

**Taking Turns** Jan 11 2021 Fear of contagion, isolated patients, a surge of overwhelming and unpreventable deaths, and the frontline healthcare workers who shouldered the responsibility of seeing us through a deadly epidemic: as we continue to confront the global pandemic caused by COVID-19, Taking Turns reminds us that we’ve been through this before. Only a few decades ago, the world faced another terrifying and deadly health crisis: HIV/AIDS. Nurse MK Czerwiec began working at the Illinois Masonic Medical Center’s HIV/AIDS Care Unit 371 in the 1990s—a pivotal time in the history of AIDS. Deaths from the disease in the United States peaked in 1995 and then dropped drastically in the following years, with the release of effective drug treatments. In this graphic memoir, Czerwiec provides an insider’s view of the lives of healthcare workers, patients, and loved ones from Unit 371. With humor, insight, and emotion, MK shows how the patients and staff cared for one another, how the sick faced their deaths, and how the survivors looked for hope in what seemed, at times, like a hopeless situation. Drawn in a restrained, inviting style, Taking Turns is an open, honest look at suffering, grief, and resilience among a community of medical professionals and patients at the heart of the AIDS epidemic.

*China Turns to Multilateralism* Jul 17 2021 China’s recent rapid economic growth has drawn global attention to its foreign policy, which increasingly has had an impact on world politics. In contrast with China’s long-standing preference for bilateralism or unilateralism in foreign policy, recent decades have seen changes in the PRC’s attitude and in its declaratory and operational policies, with a trend toward the accepting and advocating of multilateralism in international affairs. Whilst China’s involvement has been primarily in the economic arena, for example, participation in the World Trade Organization and ASEAN Plus Three, it has more recently expanded into international security institutions, such as the Shanghai Cooperation Organization. This book records, analyzes, and attempts to conceptualize, this phenomenal development in Chinese foreign policy and its impact on international relations, with the emphasis on China’s active participation in multilaterally-oriented regional security regimes. Written by an impressive team of international scholars, this book is the first collective effort in the field of China studies and international relations to look at China’s recent turn to multilateralism in foreign affairs. It will appeal to students and scholars of Chinese politics and foreign policy, security studies and international relations.

**Cultural Turns/Geographical Turns** Dec 22 2021 Introduces undergraduates to the key debates regarding space and culture and the key theoretical arguments which guide cultural geographical work. This book addresses the impact, significance, and characteristics of the 'cultural turn' in contemporary geography. It focuses on the development of the cultural geography subdiscipline and on what has made it a peculiar and unique realm of study. It demonstrates the importance of culture in the development of debates in other subdisciplines within geography and beyond. In line with these previous themes, the significance of space in the production of cultural values and expressions is also developed. Along with its timely examination of the health of the cultural geographical subdiscipline, this book is to be valued for its analysis of the impact of cultural theory on studies elsewhere in geography and of ideas of space and spatiality elsewhere in the social sciences.

**Some Turns of Thought in Modern Philosophy** Sep 30 2022 Some Turns of Thought in Modern Philosophy by George Santayana is about Santayana's personal philosophical views on ethics, science, and morals. Santayana writes lucidly and humorously about a wide range of topics. Excerpt: "A good portrait of Locke would require an elaborate background. His is not a figure to stand statuesquely in a void: the pose might not seem grand enough for bronze or marble. Rather he should be painted in the manner of the Dutch masters, in a sunny interior, scrupulously furnished with all the implements of domestic comfort and philosophic inquiry: the Holy Bible open majestically before him, and beside it that other revelation—the terrestrial globe."

**Turns of Event** Aug 30 2022 American literary studies has undergone a series of field redefinitions over the past two decades that have been consistently described as "turns," whether transnational, hemispheric, postnational, spatial, temporal, postsecular, aesthetic, or affective. In Turns of Event, Hester Blum and a splendid roster of contributors explore the conditions that have produced such movements. Offering an overview of the state of the study of nineteenth-century American literature, Blum contends that the field's propensity to turn, to reinvent itself constantly without dissolution, is one of its greatest strengths. The essays in the volume's first half, "Provocations," trace the theoretical and methodological development and institutional emergence of certain turns, as well as providing calls to arms. The geopolitically oriented turns toward the transnational, hemispheric, and oceanic (whether Atlantic, Caribbean, Pacific, or archipelagic in focus) have held a certain prevalence in American studies in recent years, and the second half of this volume presents a series of scholarly essays that exemplify these subfields. Taken together, these essays survey the field of American literary studies as it moves beyond new historicism as its primary methodology and evolves in light of ideological, conceptual, and material considerations. There is much at stake in these movements: the consequences and opportunities range from citational and evidentiary practices to canon expansion, resource allocation, and institutional futurity. Contributors: Monique Allewaert, Ralph Bauer, Hester Blum, Martin Brückner, Michelle Burnham, Christopher Castiglia, Sean X. Goudie, Meredith L. McGill, Geoffrey Sanborn.
