The Arab Spring and Arab Thaw Apr 15 2021 What were the unifying principles or strategies that governed the protest movements that swept the Middle East and North Africa in the spring of 2011? Who were the protestors and how did the different authoritarian regimes respond to them? How did regional and international institutions react to a region in turmoil? **The Arab Spring and Arab Thaw; Unfinished Revolutions and the Quest for Democracy** addresses these questions by examining a range of successful and unsuccessful protest strategies and counter revolutionary tactics employed by protestors and autocratic regimes. Contributors explore the reactions of the USA, EU and Arab League to events in the region and provide insight as to the gendered dimensions of the struggle along with the ethnic and tribal divisions that continue to impact the post-revolt period. By addressing these critical queries the book demonstrate how the Arab Spring has evolved into a protracted Arab Thaw that continues to profoundly affect regional and international politics.

The Growth of Islamic Finance and Banking

Jan 31 2020 This book covers the recent literature concerning Islamic banking and finance (IBF), focuses on the history of IBF since its inception and introduces the latest innovative concepts and practices in the field. The authors cover important topics such as the role of ownership, Shari'ah compliance and governance structures in raising debt capital using IBF practices, including Fatwa issues and the use of benchmarking practices. The book also addresses topics like archival data, the influence of leverage on ownership structure,

and sukuk structures, as well as misconceptions, threats, challenges and opportunities in IBF. Finally, the book deals with prominent issues such as business score-carding, Takāful (Islamic Insurance), IBF implications for block-chain-based fintech and finance hub concepts in Islamic microfinance models. This edited volume is an important contribution to the IBF literature as it provides a much-needed in-depth look into industry practices through the perspective of corporate finance and governance. With its interdisciplinary approach covering legal and financial issues along with a wide variety of notable contributors, this book will be a valuable reference guide to both teachers and students of Islamic banking and economics. **2011 Global Hunger Index** **The challenge of hunger: Taming price spikes and excessive food price volatility** Feb 11 2021

Somali Piracy Jan 01 2020 Maritime piracy off the coast of Somalia was first recognised as a global concern in 2008 after the hijackings of World Food Programme vessels. It remains a serious impediment to international maritime trade and a significant risk to seafarers. Bringing a criminological perspective to the subject, this book presents an analysis of Somali piracy by means of Routine Activity Theory and regulatory pluralism. Based on data from a range of sources, including published documents and in-depth interviews with representatives of industry, government, and international organisations, the study concludes that no one institution or policy will suffice to control Somali piracy. Accordingly, a number of different actors and institutions have a role to play in reducing the supply of motivated offenders, the vulnerability of prospective victims, and in enhancing guardianship. The book envisages a holistic counter-piracy program based on a pluralistic regulatory model that is sustainable within the region, and

managed by the region, providing the best opportunity for both the immediate future, and for long-term success. This study will be essential reading for criminologists, public policy and legal scholars, as well as policy makers and regulators in countries affected by and dealing with piracy, and international professional advocacy groups operating in the maritime space.

Beyond the Bubble Test Jul 07 2020 Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. **Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning** synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in **Beyond the Bubble Test** paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. **Beyond the Bubble Test** situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our

U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.

Optical Fiber Telecommunications Volume VIB Oct 02 2022 Optical Fiber

Telecommunications VI (A&B) is the sixth in a series that has chronicled the progress in the R&D of lightwave communications since the early 1970s. Written by active authorities from academia and industry, this edition brings a fresh look to many essential topics, including devices, subsystems, systems and networks. A central theme is the enabling of high-bandwidth communications in a cost-effective manner for the development of customer applications. These volumes are an ideal reference for R&D engineers and managers, optical systems implementers, university researchers and students, network operators, and investors. Volume A is devoted to components and subsystems, including photonic integrated circuits, multicore and few-mode fibers, photonic crystals, silicon photonics, signal processing, and optical interconnections. Volume B is devoted to systems and networks, including advanced modulation formats, coherent detection, Tb/s channels, space-division multiplexing, reconfigurable networks, broadband access, undersea cable, satellite communications, and microwave photonics. All the latest technologies and techniques for developing future components and systems Edited by two winners of the highly prestigious OSA/IEEE John Tyndal award and a President of IEEE's Lasers & Electro-Optics Society (7,000 members) Written by leading experts in the field, it is the most authoritative and comprehensive reference on optical engineering on the market

Bank PO Solved Papers Quantitative Aptitude

2020 Jul 31 2022 IBPS is one of the major bodies of Banking Sector which is responsible for its fair and transparent selection of candidates into its participating banks through multiple online-based tests. It has recently released its employment notification for the post of Probationary Officers (PO) and Management Trainees (MT) which will occur in three stages - Prelims and Mains followed by a Common Interview. The current edition of "20 Years' (2009 - 2000) Chapterwise Solved Papers Bank PO Quantitative Aptitude" has been carefully revised for the candidates who are preparing for the banking exams like IBPS PO, SBI PO, Nationalised Bank PO, and more. This practice book provides the ample amount of solved papers arranged in 20 Chapters with more than 5000 Objective questions for the conceptual clarity. Each chapter is incorporated with highly useful study material and gives detailed explanations of all questions. It also include Practice Sets and 3 Solved Papers that helps to solidify the practice and track level progress and help them to know the stringer and weaker areas of the aspirants. Bringing complete study resources for various Bank PO exams at one place for the convenience of aspirants, this book is also useful for RBI Grade I, RRB Scale I, Insurance Sector and other exams. 2017 International Comparison Program for Asia and the Pacific Jul 19 2021 This

publication provides a comprehensive account of the 2017 International Comparison Program (ICP) cycle for 22 economies in Asia and the Pacific. It provides in-depth analyses of estimates of purchasing power parities (PPPs), total and per capita real (PPP-converted) gross domestic product and its component expenditures, and price level indexes showing relative costs of living. The PPPs enable comparison in real terms across economies by removing the price level differences among them. This report also presents in detail the conceptual framework and methodological approaches used in implementing the ICP.

China-India Economics May 05 2020 A review of the existing literature on the China-India comparative theme conveys the distinct impression that the literature largely projects China and India as intrinsically competitive entities. While much has been written on where and why China and India are contesting, particularly from a political sense, very little attention has been devoted to mutual collaboration, whether existing or potential. Such possibilities are at their greatest in economics, which will dominate the future China-India relationship. This book explores Sino-Indian ties from a comparative economic perspective and argues that it is erroneous to visualise the ties either from exclusively competitive or collaborative perspectives. The future relationship between the two countries will be characterised simultaneously by two ?C?s: competition and collaboration, which are both linked to common challenges facing them. Arguing that while competition in the economic sphere is inevitable, given their size and aspirations, the book contends that negative externalities from competition will encourage both countries to collaborate and expand the scope of such collaboration. The book's refreshing angle makes it a must-read for those interested in Sino-Indian relationship.

Asian Space Race: Rhetoric or Reality? Jun 25 2019 This book explores the character and contours of the Asian Space Powers. At present, Asian states like China, Japan and India are found investing in space technologies with analogous social and scientific and probably with divergent military intents. Other Asian states like Israel, South Korea and Malaysia are also making investments in the space arena. States like Iran and North Korea are faulted for using space launches as a demonstrative tool to achieve strategic objectives. This work examines this entire maze of activities to unearth where these states are making these investments to accomplish their state-specific goal or are they also trying to surpass each other by engaging in competition. Explaining why and how these states are making investments towards achieving their socio-economic and strategic mandate this book infers that the possibility of Asian Space Race exists but is presently fairly diminutive.

Selected Areas in Cryptography - SAC 2015

Oct 22 2021 This book contains revised selected papers from the 22nd International

Conference on Selected Areas in Cryptography, SAC 2015, held in Sackville, NB, Canada in August 2015. The 26 full papers and 3 short papers presented in this volume were carefully reviewed and selected from 91 submissions. They are organized in topical sections named: privacy enhancing technologies; cryptanalysis of symmetric-key primitives; implementation of cryptographic schemes; short papers; privacy preserving data processing; side channel attacks and defenses; new cryptographic constructions; authenticated encryption; on the hardness of mathematical problems; and cryptanalysis of authenticated encryption schemes.

Teacher Education in Globalised Times Aug 08 2020 This book provides commentary on the influence of multi-layered political contexts that surround the work of teacher educators worldwide. It addresses the drawbacks of the massification, standards-based movements and marketisation of universal business that threaten authenticity, innovation and entrepreneurship within teacher education on a global scale. The chapters celebrate the richly described local stories that explore the often tacit political activity that underpins teacher educators' work. The book highlights the commitment of both teachers and teacher educators to social justice, and human rights and critical consciousness as central to the process of teacher development. Teacher formation, teacher education policies and curriculum development in an era of globalisation, super-diversity and the positioning of Indigenous populations, and national regulation and localisation are topics that are explored in this book.

It is divided into thematic sections, following the IB syllabus structure and is written in clear, accessible English. It covers the following areas for detailed study: Americas: Cuba - Castro; Asia and Oceania: China - Mao; and Europe and Middle East: Germany - Hitler; USSR - Stalin. Tailored to the requirements and assessment objectives of the syllabus, this new coursebook provides opportunities for students to make comparisons between different regions and time periods.

Advanced Optical and Wireless

Communications Systems Sep 01 2022 The new edition of this popular textbook keeps its structure, introducing the advanced topics of: (i) wireless communications, (ii) free-space optical (FSO) communications, (iii) indoor optical wireless (IR) communications, and (iv) fiber-optics communications, but thoroughly updates the content for new technologies and practical applications. The author presents fundamental concepts, such as propagation principles, modulation formats, channel coding, diversity principles, MIMO signal processing, multicarrier modulation, equalization, adaptive modulation and coding, detection principles, and software defined transmission, first describing them and then following up with a detailed look at each particular system. The book is self-contained and structured to provide straightforward guidance to readers looking to capture fundamentals and gain theoretical and practical knowledge about wireless communications, free-space optical communications, and fiber-optics communications, all which can be readily applied in studies, research, and practical applications. The textbook is intended for an upper undergraduate or graduate level courses in fiber-optics communication, wireless communication, and free-space optical communication problems, an appendix with all background material needed, and homework problems. In the second edition, in addition to the existing chapters being updated and problems being inserted, one new chapter has been added, related to the physical-layer security thus covering both security and reliability issues. New material on 5G and 6G technologies has been added in corresponding chapters.

The Routledge Companion to the Geography of International Business Dec 12 2020 The fields of Economic Geography and International Business share an interest in the same phenomena, whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena. The Routledge Companion to the Geography of International Business explores the nature and scope of inter-disciplinary work between Economic Geography and International Business in explaining the central issues in the international economy. Contributions written by leading specialists in each field (including some chapters written by inter-disciplinary teams) focus on the nature of

multinational firms and their strategies, where they choose to locate their activities, how they create and manage international networks and the key relationships between multinationals and the places where they place their operations. Topics covered include the internationalisation of service industries, the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge, goods and services flow between locations. The book examines the areas for fruitful inter-disciplinary work between International Business and Economic Geography and sets out a road map for future joint research, and is an essential resource for students and practitioners of International Business and Economic Development.

Monthly Summary of Foreign Commerce of the United States Mar 03 2020

British Foreign Policy Nov 10 2020 Britain has been a significant voice in global politics in the last two decades and its impact on world events far outweighs its material resources. But how does a small island on the edge of Europe continue to exercise this level of power on an international scale? What kind of actor is Britain internationally? And what future challenges will confront British foreign policymakers in a multi-polar world of emerging powers? In this comprehensive introduction to British foreign policy today Jamie Gaskarth addresses these and other key questions. Against a rich historical backdrop, he examines the main actors and processes involved in British foreign policy-making as well as the role played by identity in shaping such choices. Later chapters focus on the relationship between economics and foreign policy, what it means to be ethical in this policy sphere, and the justification for and benefits of the UK's continued use of force to achieve its foreign policy goals. Combining interview research, theoretical insight and analysis of contemporary and historical trends, this book charts how British foreign policy has come to be understood and practised in the 21st Century. It will be an invaluable guide for students of British politics, foreign policy, international relations and related courses.

Oil, Wine, and the Cultural Economy of Ancient Greece Sep 08 2020

In this book, Catherine E. Pratt explores how oil and wine became increasingly entangled in Greek culture, from the Late Bronze Age to the Archaic period. Using ceramic, architectural, and archaeobotanical data, she argues that Bronze Age exchange practices initiated a strong network of dependency between oil and wine production, and the people who produced, exchanged, and used them. After the palatial collapse, these prehistoric connections intensified during the Iron Age and evolved into the large-scale industries of the Classical period. Pratt argues that oil and wine in pre-Classical Greece should be considered 'cultural commodities', products that become

indispensable for proper social and economic exchanges well beyond economic advantage. Offering a detailed diachronic account of the changing roles of surplus oil and wine in the economies of pre-classical Greek societies, her book contributes to a broader understanding of the complex interconnections between agriculture, commerce, and culture in the ancient Mediterranean.

Obama and the Middle East Oct 29 2019
A hard-hitting assessment of Obama's current foreign policy and a sweeping look at the future of the Middle East
The 2011 Arab Spring upended the status quo in the Middle East and poses new challenges for the United States. Here, Fawaz Gerges, one of the world's top Middle East scholars, delivers a full picture of US relations with the region. He reaches back to the post-World War II era to explain the issues that have challenged the Obama administration and examines the president's responses, from his negotiations with Israel and Palestine to his drawdown from Afghanistan and withdrawal from Iraq. Evaluating the president's engagement with the Arab Spring, his decision to order the death of Osama bin Laden, his intervention in Libya, his relations with Iran, and other key policy matters, Gerges highlights what must change in order to improve US outcomes in the region. Gerges' conclusion is sobering: the United States is near the end of its moment in the Middle East. The cynically realist policy it has employed since World War II--continued by the Obama administration--is at the root of current bitterness and mistrust, and it is time to remake American foreign policy.
