Diabetes in Old Age Jan 13 2021 This new edition of the popular and market-leading *Diabetes in Old Age* features up-to-date and comprehensive information about the key aspects of managing older people with diabetes, predominantly type 2 diabetes. With a strong evidence-based focus throughout, the entire range of issues surrounding diabetes and its many complications are covered, each with a clear focus on how they relate directly to the older patient. Varying approaches to optimizing diabetes care in the community, primary care and secondary care health care arenas are presented, and the importance of comprehensive functional assessment is emphasized. Coverage of areas unique to an ageing population of older people with diabetes such as falls management, frailty and sarcopenia, and cognitive dysfunction form a key cornerstone of the book. In every chapter, best practice points and key learning outcomes are provided, as well as published evidence bases for each major conclusion. *Diabetes in Old Age*, 4th edition is essential reading for diabetologists and endocrinologists, diabetes specialist nurses, primary care physicians, general physicians and geriatricians, podiatrists and dieticians with an interest in diabetes, as well as all health professionals engaged in the delivery of diabetes care to older people.

The Censor, the Editor, and the Text Apr 03 2020 By bringing together two apparently unrelated issues - the role of censorship in the creation of print culture and the place of Jewish culture within the context of Christian society - the author advances a new outlook on both, allowing each to be examined through the conceptual framework usually reserved for the other.

The Enlightenment Bible Jun 25 2019 How did the Bible survive the Enlightenment? In this book, Jonathan Sheehan shows how Protestant translators and scholars in the eighteenth century transformed the Bible from a book justified by theology to one justified by culture. In doing so, the Bible was made into the cornerstone of Western heritage and invested with meaning, authority, and significance even for a secular age. The Enlightenment Bible offers a new history of the Bible in the century of its greatest crisis and, in turn, a new vision of this century and its effects on religion. Although the Enlightenment has long symbolized the corrosive effects of modernity on religion, Sheehan shows how the Bible survived, and even thrived in this cradle of ostensible secularization. Indeed, in eighteenth-century Protestant Europe, biblical scholarship and translation became more vigorous and culturally significant than at any time since the Reformation. From across the theological spectrum, European scholars--especially German and English--exerted tremendous energies to rejuvenate the Bible, reinterpret its meaning, and reinvest it with new authority. Poets, pedagogues, philosophers, literary critics, philologists, and historians together built a post-theological Bible, a monument for a new religious era. These literati forged the Bible into a cultural text, transforming the theological core of the Judeo-Christian tradition. In the end, the Enlightenment gave the Bible the power to endure the corrosive effects of modernity, not as a theological text but as the foundation of Western culture.

Jewish History and Jewish Memory May 05 2020 Publication of Yosef Yerushalmi's *Zakhor* in 1982 inspired a generation of scholarly inquiry into historical images and myths, the construction of the Jewish past, and the making and meaning of collective memory. Here, eminent scholars in their respective fields extend the lines of his seminal study into topics that range from medieval rabbinics, homiletics, kabbalah, and Hasidism to antisemitism, Zionism, and the making of modern Jewish identity. Essays are clustered around four central themes: historical consciousness and the construction of memory; the relationship between time and history in Jewish thought; the demise of traditional forms of collective memory; and the writing of Jewish history in modern times.

European Traditions in Civil Procedure Mar 15 2021 European co-operation has resulted in many new and challenging opportunities for legal scholars who, since the so-called 'codification period', have become used to operating in a purely national context. This applies also to scholars in the field of civil procedure, who, for a considerable period of time, have resisted leaving the purely national domain. These scholars have devoted a great deal of attention to the question whether or not harmonisation of civil procedural law is a feasible option, and, if so, in what manner harmonisation should be achieved. The contributors to this book seek to further the harmonisation debate by exploring some of the main trends in the development of civil procedural law during the last two centuries in several European countries (Germany, Austria, Switzerland, France, England and Wales, The Netherlands and Belgium). Two of the central issues that are addressed by the contributors are the extent to which the various procedural models have influenced each other and the extent to which common traditions in civil procedural law may be distinguished in Europe. Each general chapter in this book is supplemented by three chapters devoted to specific procedural topics: Conciliation, Party Interrogation as Evidence and the Role of the Judge. In addition, extensive bibliographical references are included.

Righteous Porkchop Aug 20 2021 Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the “factory farm” industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, *Righteous Porkchop* chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish

from traditionally farmed sources.

Landmine Arms Control Mar 27 2022 Perhaps 80 to 110 million unexploded mines are now scattered over 64 countries worldwide. These mines kill or maim as many as 2,000 people a month most of them civilians, many of them children. The purpose of the paper is to evaluate the pros and cons of addressing this problem via negotiated arms control agreements to ban the production, stockpiling, export and/or use of mines. Our principal findings are that neither the costs nor the benefits are likely to be as great as many have argued. Because costs and benefits are incommensurate, landmine arms control could not be an open and shut case either for or against on its analytical merits, but the value judgment required to reach a conclusion is likely to be a closer call than many in the current debate would suggest.

Higgs boson potential at colliders: status and perspectives Aug 27 2019 Questo documento riassume lo stato attuale degli ricerche studi, teorici e sperimentali, sulla produzione di coppie di bosoni di Higgs, e sui vincoli, sia diretti che indiretti, al valore del termine di auto-interazione del bosone di Higgs, con l'intento di servire da referenza per i prossimi anni. Il documento discute lo stato degli studi teorici, includendo le più recenti stime della sezione di produzione di coppie di bosoni di Higgs, sviluppi sulle teorie di campo efficaci, e studi su specifici scenari di nuova fisica che possono contribuire alla produzione di due bosoni di Higgs. Sono presentati i più recenti risultati sperimentali sulle ricerche di coppie di bosoni di Higgs e sui limiti diretti e indiretti al termine di auto-interazione, ottenuti al Large Hadron Collider di Ginevra, con una panoramica delle tecniche sperimentali. Infine, sono discusse le capacità dei collisionatori futuri di determinare il termine di auto-interazione del bosone di Higgs. Questo lavoro è iniziato come raccolta di contributi della conferenza "Di-Higgs ai Colliders", che ha avuto luogo a Fermilab dal 4 al 9 settembre 2018, ma gli argomenti discussi vanno al di là di quelli presentati alla conferenza, includendo ulteriori sviluppi.
