Crisis and Restructuring in East Asia Nov 03 2022 This book criticizes the widespread view that the 1997 Asian crisis was due to 'crony capitalism' and puts the blame instead on misguided liberalization. It

analyzes the case of Korea's business conglomerates, the chaebol, with particular attention to the car industry, to show how liberalization contributed to the crisis even at the level of the firm. It shows how those firms that had developed innovative capabilities survived the crisis much better than those that had merely expanded into markets opened up by liberalization.

Camaro & Firebird - GM's Power Twins Sep 08 2020 *GM's 1-2 Punch* The argument will never have a winner. Which car was cooler, the Chevrolet Camaro, or the Pontiac Firebird? The two legendary GM F-bodies had so much in common - including the year they were born - that they would be forever joined at the hip. They were wildly popular with the car buying public and came in so many varieties that almost any driver could find happiness with a Camaro or Firebird. Alas, all good things usually come to an end, and GM pulled the plug on the two legendary nameplates in 2002 after 35 great years. After Pontiac's demise, the Firebird and Trans Am may be gone for good - certainly as "Poncho" offspring - but thankfully, the Camaro is back by popular demand. In *Camaro and Firebird: GM's Power Twins*, muscle car expert John Gunnell traces the year-by-year development of both legendary cars. With more than 225 color photos and fact-laden yearly bios, Gunnell packs 38 model years into one easy-to-use resource.

1969 Chevrolet Chevelle SS 396: Muscle Cars In Detail No. 12 Mar 27 2022 Celebrate Chevrolet's wildly successful 1969 Chevelle SS 396 with this comprehensive publication that covers options for the engine, transmission, paint, aesthetics, and more!

Chevrolet's marketing campaign for the 1969 Chevelle changed the SS 396 to an option instead of its own series. For this year only, the SS 396 Equipment option was offered on four different bodystyles (coupe, sport coupe, convertible, and sedan pickup) and in two series (300 Deluxe and Malibu). The clean styling and extended production year saw sales at 86,307 units sold with the SS 396 Equipment option, the all-time high watermark. The SS 396 equipment option offered three engine packages: those with 325, 350, and 375 hp--the latter being available with an aluminum-head option (L89). Two SS 396-specific paint colors (Daytona Yellow and Hugger Orange) were available at a \$42.15 charge adding a splash of brightness to the color chart palette. The year 1969 was also the first time that an SS 396 Chevelle came with its own special wheels. Leading Chevelle specialists contributed data to this book, certifying that the information presented is accurate and ensuring that 1969 Chevrolet Chevelle SS 396: Muscle Cars In Detail No. 12 will be a valued resource guide for years to come.

American Cars, 1973-1980 Feb 11 2021 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

American Light Trucks and Utility Vehicles, 1967-1989 Oct 02 2022 The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

The Global Korean Motor Industry May 17 2021 This book examines the experiences of the globalizing Korean automobile industry, with particular focus on the Hyundai Motor Company (HMC), one of the most prominent of the new Korean multinational corporations. It provides an overview of the changing nature of the global automobile industry, before considering in depth the globalization processes that the Korean automobile industry has undertaken. Tracing the development of HMC as it recovered from the failure of its first venture overseas, in Canada, and tried again in India, the authors explore the similarities and differences between the practices which HMC implemented in India and Korea. They highlight the importance of production systems and employment relations as part of HMC's growth, and argue that if Korean companies such as HMC are to compete successfully as global automobile producers they will need to increase the proportion of overseas production, establish global supply chains and improve co-ordination between head office and subsidiaries. Based upon extensive fieldwork in India and Korea, this book is a detailed account of the globalization of the Korean automobile industry and Hyundai Motor Company. Its findings will be of importance to all those who seek to understand the challenges faced by firms that attempt to become global players.
