The First 20 Hours Jun 05 2020 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit

down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Academy of Management Learning & Education May 05 2020

Jumping the Curve Jun 25 2019 Foreword by Tom Peters Internationally known management consultants Nicholas Imparato and Oren Harari connect the big picture of our changing civilizations with the specific practical actions that managers have to take to produce results today. All organizations are faced with the same challenge: the need to jump the curve to make significant, discontinuous leaps in their thinking, whether about product, technology, or management style. The alternative to follow current practices all the way to their inevitable decline is unacceptable. The authors show us that it is also unnecessary. Drawing on numerous personal interviews with innovative leaders around the world, as well as research and first-hand observation, Imparato and Harari identify the four strategic imperatives--innovation, intelligence, coherence, and responsibility--that will enable companies to successfully jump the curve and thrive in the emerging epoch. And they show how cutting-edge companies and leaders are translating these imperatives into action. Not since the dawn of the Modern Age some five hundred years ago has civilization undergone the kind of profound, rapid-fire changes we're experiencing today. Even organizations that are adapting, growing and innovating have the gnawing sense that obsolescence is right around the corner. *Jumping the Curve* offers perspective and guidance for doing business at this unique moment in time. It connects the big picture of our changing world with the practical actions managers must take now to position their organizations for success in a new epoch we can't yet fully see or understand.

Data Mining and Business Analytics with R Oct 22 2021
Collecting, analyzing, and extracting valuable information from a large amount of data requires easily accessible, robust, computational and analytical tools. *Data Mining and Business Analytics with R* utilizes the open source software R for the analysis, exploration, and simplification of large high-dimensional data sets. As a result, readers are provided with the needed guidance to model and interpret complicated data and become adept at building powerful models for prediction and classification. Highlighting both underlying concepts and practical computational skills, *Data Mining and Business Analytics with R* begins with coverage of standard linear regression and the importance of parsimony in statistical modeling. The book includes important topics such as penalty-based variable selection (LASSO); logistic regression; regression and classification trees; clustering; principal components and partial least squares; and the analysis of text and network data. In addition, the book presents: • A thorough discussion and extensive demonstration of the theory behind the most useful data mining tools • Illustrations of how to use the outlined concepts in real-world situations • Readily available additional data sets and related R code allowing readers to apply their own analyses to the discussed materials • Numerous exercises to help readers with computing skills and deepen their understanding of the material
Data Mining and Business Analytics with R is an excellent graduate-level textbook for courses on data mining and business analytics. The book is also a valuable reference for practitioners who collect and analyze data in the fields of finance, operations management, marketing, and the information sciences.

Data Analysis in Business Research Mar 15 2021 While there are books focusing on parametric tests, the domain of nonparametric tests is mostly unexplored. Data Analysis in Business Research: A Step by Step Nonparametric Approach brings under one umbrella all the major nonparametric statistical tools that can be used by undergraduate and postgraduate students of all disciplines, especially students of Research Methods in Social Sciences and Management Studies, in their dissertation work. Students face difficulty in analyzing data collected from small samples; they end up reporting mere percentage analysis which results in the loss of information collected. Hence there is a need to create awareness among students and researchers about the application of major nonparametric tools that can be applied confidently without worrying about sample size, scale of measurement, normality assumptions or other parameters of that nature. The lucid presentation of the step-by-step procedures, explaining in simple English how to perform each of the major nonparametric tests, is a major attraction of the book. The book, which also has a comprehensive question bank, assumes minimal or little knowledge of statistics on the part of the reader. This book

will also be informative for Marketing Research professionals and organisations, consultancies and organisations of economic research. **GMAT Critical Reasoning** Nov 30 2019 "Learn how to identify question types, simplify arguments, and eliminate wrong answers efficiently and confidently. Practice the logic skills tested by the GMAT and master proven methods for solving all Critical Reasoning problems"--Page 4 of cover.

45 Business School (MBA)

Recommendation Letters: That Made a Difference Aug 27 2019 When they prepare for business school, few candidates take the time to acquire the caliber of recommendation letters they will need to distinguish themselves in a highly competitive applicant pool. This book, which was written by an Ivy League admissions expert, offers detailed advice to write (and get) persuasive letters that highlight the personal, academic and professional strengths the committee expects to see. It also includes 45 successful MBA recommendation letters, including several that "explain" extenuating circumstances in a candidate's history (such as disappointing grades, a gap in employment, and low GMAT scores). At top business schools, where the competition is fierce, the quality and depth of a candidate's reference letters can make the difference between acceptance and rejection. Whether you are an applicant who needs a persuasive letter of recommendation, or someone who has been asked to write one, this exceptional book is mandatory reading.

Give and Take Jul 31 2022 A groundbreaking look at why our interactions with others hold the key to success, from the bestselling author

of *Think Again* and *Originals* For generations, we have focused on the individual drivers of success: passion, hard work, talent, and luck. But in today's dramatically reconfigured world, success is increasingly dependent on how we interact with others. In *Give and Take*, Adam Grant, an award-winning researcher and Wharton's highest-rated professor, examines the surprising forces that shape why some people rise to the top of the success ladder while others sink to the bottom. Praised by social scientists, business theorists, and corporate leaders, *Give and Take* opens up an approach to work, interactions, and productivity that is nothing short of revolutionary.

Your MBA Game Plan, Third Edition Jun 29 2022 The MBA has rapidly become the world's most desired degree, with graduates of top business schools landing six-figure pay packages in private equity, high-tech,

investment banking, and management consulting. As a result, the competition for admission into select programs is fierce; some schools admit less than 10 percent of applicants. This third edition of *Your MBA Game Plan* includes even more sample essays and resumes from successful applicants, fresh insight on 35 leading business schools from around the world, and advice specifically tailored to international applicants. It will show you how to: Select target schools and highlight the personal characteristics and skill sets they seek Navigate the "GMAT or GRE?" question Assess your own candidacy with the objective eye of an MBA admissions officer Craft compelling essays and resumes that highlight your most salient attributes and make you stand out to the admissions committee Avoid the mistakes that ruin thousands of applicants' chances each year Perform flawlessly during your admissions interviews
