Run to the Finish Nov 18 2021 Inspiration and practical tips for runners who prioritize enjoyment over pace and embrace their place as an "average" runner In her first

book, popular runner blogger Amanda Brooks lays out the path to finding greater fulfillment in running for those who consider themselves "middle of the pack runners" -- they're not trying to win Boston (or even qualify for Boston); they just want to get strong and stay injury-free so they can continue to enjoy running. *Run to the Finish* is not your typical running book. While it is filled with useful strategic training advice throughout, at its core, it is about embracing your place in the middle of the pack with humor and learning to love the run you've got without comparing yourself to other runners. Mixing practical advice like understanding the discomfort vs. pain, the mental side of running, and movements to treat the most common injuries with more playful elements such as "Favorite hilarious marathon signs" and "Weird Thoughts We all Have at the Start Line," Brooks is the down-to-earth, inspiring guide for everyone who wants to be happier with their run.

Smart Marathon Training Jun 13 2021 Old-school marathon training plans ask runners to crank out 70 to 100 miles a week. It's no wonder those who make it to the start line are running ragged. *Smart Marathon Training* maps out a healthier, more economical approach to training that emphasizes quality over quantity. This innovative program eliminates junk miles, paring down training to three essential runs per week and adding a dynamic strength and cross-training program to build overall fitness. Runners will train for their best performance in

less time and avoid the injuries, overtraining, and burnout that come from running too much. Smart Marathon Training builds up a runner's body to resist injury. Runners gain the strength they need to run long using functional exercises that target the hips, glutes, and quads. Running is a full-body sport, so this training program also builds a strong core and upper body to avoid injuries that begin above the waist. No one fakes a marathon or half-marathon--everyone has to do the work. But Smart Marathon Training replaces long, grinding miles with low-impact cross-training. Horowitz outlines a cycling plan to complement run workouts, boosting base fitness while saving runners' bodies for their best runs. With more than 75 detailed exercises plus six easy-to-follow training plans for half- and full marathons, Smart Marathon Training will get you to the start line feeling refreshed and ready to run your best race yet.

The Non-Runner's Marathon Trainer Sep 16 2021

Athlete. Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. The Non-Runner's Marathon Trainer is based on the highly successful marathon class offered by the University of Northern Iowa, which was featured in a *Runner's World* article titled "Marathoning 101." The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't

have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: "I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way." This is marathon running for real people, people with jobs and families and obligations outside of running. The Non-Runner's Marathon Trainer has proven successful for men and women of all ages. Now let it work for you.

Master the Marathon Apr 23 2022 “A must-have for any woman targeting the distance.” —Runner’s World A no-nonsense, interactive guide that empowers all women at all levels to run their strongest, best marathon ever As recently as 1966, women were forbidden to run in the

marathon. Professionals—including doctors—believed it was physically impossible and dangerous for women to run more than a mile and a half. But as with many other barriers women have faced over time, we fought our way in. Today, women make up almost half of the marathoning population. Yet most marathon training manuals are written by men. And while these men are experts when it comes to how men can and should train, women need training programs tailored to our bodies—to our unique strengths and weaknesses—so that we can avoid injuries and run at our peak. The programming in this book was created by a woman, specifically for women. *Master the Marathon* is a comprehensive guide to marathon training for women at all levels of running—beginner, intermediate, and advanced. The book takes you through everything you need to know to be prepared for the 26.2 miles of the marathon, including detailed training plans, strength training programs, building your mental awareness of your physical body, nutrition, guidance on finding the best marathon for you, identifying and avoiding potential injuries, inspirational advice, and other unexpected pieces of wisdom. Both incredibly practical and deeply motivating, *Master the Marathon* will help you unlock the strength and determination inside you to embark on the spectacular journey that is the marathon.
