Rock Dogs Mar 27 2022 Can rock n' roll and politics mix? Rock Dogs looks at the impact of government music policies on the Australian music scene, youth culture, and national identity. In the 1980s to early 1990s, rock music in Australia became one of the unlikely targets of the Australian Labor Party's (ALP) cultural policies. Younger ALP politicians and activists were galvanized to create a series of unique initiatives, such as Ausmusic and the Victorian Rock Foundation, which targeted Australian youth through the music industry. The policies, which used techniques adapted from other cultural industries like television and film, were diverse and innovative, but unproven in the music industry. Despite the optimism fueling these cultural policies, various governmental inquiries, increased resistance from major studios, and a growing divide between the needs of the people and the music industry eventually dampened them. Rock Dogs is a candid, observant study of the legacy of these cultural policies and the larger debate over the creation and preservation of a national culture.
