*How to Build a Steam Engine Nov 02 2022 A First-timer's full instruction guide showing how to build a genuine, steam-powered Pull You Round Traction Engine named PYRTE. Many photos from the build along with drawings to make your life easier. Needs mostly hand tools, with a small amount of very simple lathe usage. She's 26 inches long and weighs around 60lbs when ready for steaming and pulls an adult round with ease. Many have been built already by amateurs, proving the simplicity of design and being completed quickly compared to similar sized but more complicated engines and only two parts need to be purchased to complete this engine, other than steam fittings, the heating and transmission, making this engine an inexpensive project to complete with most being readily available stock from most hobby shops. By looking at this you've taken the first step to owning your own live-steam traction engine and with just a little persistence it will not be long before you are driving your own live-steam creation, built with your own hands; being pulled around easily as you watch the crankshaft and flywheel spinning almost silently right in front of your eyes as you trundle along. This is an upgraded version covering the latest steam regulations*

*[Making Simple Model Steam Engines Jun 28 2022](#) This book details the construction of a range of simple miniature steam engines and boilers. The projects, each of which can be completed with only a basic workshop, range from a single-acting oscillator to more sophisticated twin-cylinder double-acting engines and a variety of boilers. A final project brings together engine and boiler for a simple steam railway locomotive. These projects are a perfect introduction to model engineering and an enjoyable exercise for the more experienced engineer or those who wish to pass on their hobby to a younger generation. Stan Bray is an experienced craftsman in engineering and metalworking; among his previous books is *Metalworking: Tools and Techniques*.*

*The Clinchfield No. 1* Dec 31 2019 As general manager for Erwin, Tennessee-based Clinchfield Railroad, Thomas D. Moore found an eighty-six-year-old vintage 4-6-0 ten-wheeler steam engine--the Clinchfield No. 1. Miraculously, the engine had escaped the cutter's torch when, in the mid-1950s, the railroad retired its steam fleet, shuttered passenger service and embraced the diesel era. Moore wanted the No. 1 fully restored and its long life on the rails--which had included being the first train to reach the victims of the 1889 Johnstown, Pennsylvania flood--celebrated as a goodwill ambassador for the railroad. The revived Clinchfield No. 1 led beloved excursion trains that visited seven state capitals, bringing joy to passengers from the Appalachian Mountains to Tampa, Florida. Join authors Mark A. Stevens and A.J. "Alf" Peoples on the journey of the real-life little engine that could.

*Building a Portable Steam Engine* Apr 26 2022 This practical guide to constructing a model of "the Lampitt" portable steam engine is essential reading for any model engineer with limited experience who wishes to build a model capable of carrying out real work This practical, instructional book describes the construction of a model of "the Lampitt" portable steam engine, which dates back to 1862, and which provided rotative power to drive threshing machines, circular saws, feed mills, and other farm machinery. The construction of every component is described in precise detail, and the text is supported by many helpful step-by-step photographs. In addition, useful advice is provided about obtaining materials and about the tools that are required to equip a model-engineering workshop. Accordingly, the information provided in this fascinating book will enable the reader to construct not only the Lampitt engine, but also many other engineering models in the future. When the reader has finished building "the Lampitt" they will, in effect, have completed an engineering apprenticeship, and will have a model engine of which they can be proud and which fully reveals the skills that they have learned.
