The Water Dancer meets The Prophets in this spare, gripping, and beautifully rendered novel exploring love and friendship among a group of enslaved Black strivers in the mid-19th century. They call themselves the Stolen. Their owners call them captives. They are taught their captors' tongues and their beliefs but they have a language and rituals all their own. In a world that would be allegorical if it weren't saturated in harsh truths, Cato and

William meet at Placid Hall, a plantation in an unspecified part of the American South. Subject to the whims of their tyrannical and eccentric captor, Cannonball Greene, they never know what harm may befall them: inhumane physical toil in the plantation's quarry by day, a beating by night, or the sale of a loved one at any moment. It's that cruel practice—the wanton destruction of love, the belief that Black people aren't even capable of loving—that hurts the most. It hurts the reserved and stubborn

William, who finds himself falling for Margaret, a small but mighty woman with self-possession beyond her years. And it hurts Cato, whose first love, Iris, was sold off with no forewarning. He now finds solace in his hearty band of friends, including William, who is like a brother; Margaret; Little Zander; and Milton, a gifted artist. There is also Pandora, with thick braids and long limbs, whose beauty calls to him. Their relationships begin to fray when a visiting minister with a mysterious past shows up.

their heads with ideas about independence. He tells them that with freedom comes the right to choose the small things—when to dine, when to begin and end work—as well as the big things, such as whom and how to love. Do they follow the preacher and pursue the unknown? Confined in a landscape marked by deceit and uncertainty, who can they trust? In an elegant work of monumental imagination that will reorient how we think of the legacy of America’s shameful past, Jabari Asim presents a beautiful, powerful, and elegiac novel that examines intimacy and longing in the

quarters while asking a vital question: What would happen if an enslaved person risked everything for love? *In the Eye of the Wild* Jul 31 2022 After enduring a vicious bear attack in the Russian Far East's Kamchatka Peninsula, a French anthropologist undergoes a physical and spiritual transformation that forces her to confront the tenuous distinction between animal and human. In the *Eye of the Wild* begins with an account of the French anthropologist Nastassja Martin’s near fatal run-in with a Kamchatka bear in the mountains of Siberia. Martin’s

professional interest is animism; she addresses philosophical questions about the relation of humankind to nature, and in her work she seeks to partake as fully as she can in the lives of the indigenous peoples she studies. Her violent encounter with the bear, however, brings her face-to-face with something entirely beyond her ken—the untamed, the nonhuman, the animal, the wild. In the course of that encounter something in the balance of her world shifts. A change takes place that she must somehow reckon with. Left severely mutilated, dazed with pain, Martin undergoes a

operations in a provincial Russian hospital, while also being grilled by the secret police. Back in France, she finds herself back on the operating table, a source of new trauma. She realizes that the only thing for her to do is to return to Kamchatka. She must discover what it means to have become, as the Even people call it, medka, a person who is half human, half bear. In the Eye of the Wild is a fascinating, mind-altering book about terror, pain, endurance, and self-transformation, comparable in its intensity of perception and originality of style to J. A. The Book of Why

Nov 22 2021 A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual

prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have

The Performance
Jun 17 2021 A novel about three women at turning points in their lives, and the one night that changes everything. One night, three women go to the theater to see a play. Wildfires are burning in the hills outside, but inside the theater it is time for the performance to take over. Margot is

a successful, flinty professor on the cusp of retirement, distracted by her fraught relationship with her adult son and her ailing husband. After a traumatic past, Ivy is now a philanthropist with a seemingly perfect life. Summer is a young drama student, an usher at the theater, and frantically worried for her girlfriend whose parents live in the fire zone.

While the performance unfolds on stage, so does the compelling trajectory that will bring these three women together, changing them all. Deliciously intimate and yet emotionally wide-ranging, *The Performance* is a novel that both explores the inner

lives of women as it underscores the power of art and memory to transform us.

Conundrum Mar 03

2020 The great travel writer Jan Morris was born James Morris. James Morris distinguished himself in the British military, became a successful and physically daring reporter, climbed mountains, crossed deserts, and established a reputation as a historian of the British empire. He was happily married, with several children. To all appearances, he was not only a man, but a man's man. Except that appearances, as James Morris had known

childhood, can be deeply misleading. James Morris had known all his conscious life that at heart he was a woman. Conundrum, one of the earliest books to discuss transsexuality with honesty and without prurience, tells the story of James Morris—his hidden life and how he decided to bring it into the open, as he resolved first on a hormone treatment and, second, on risky experimental surgery that would turn him into the woman that he truly was.

novel.” —James Wood, *The New Yorker* “Masterful . . . astonishing.” —Cullen Murphy, *The Atlantic* “A landmark history . . . Fintan O’Toole was

born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don’t Know Ourselves*, O’Toole, one of the Anglophone world’s most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary “backwater” to an almost totally open society.

the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O'Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland's main export was beef and it was still not unknown for herds of cattle to clatter down Dublin's streets. Yet the Westerns were a sign of what was to come. O'Toole narrates the once unthinkable collapse of the all-powerful Catholic

Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles in Northern Ireland, which led most Irish to reject violent nationalism. In O'Toole's telling, America became a lodestar, from John F. Kennedy's 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably

compassionate yet exacting observer, O'Toole in coruscating prose captures the peculiar Irish habit of "deliberate unknowing," which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, *We Don't Know Ourselves* is a landmark work, a memoir and a national history that ultimately reveals how the two modes are entwined for all of us.

It is the publication where authors have been made, and where readers first encountered the classics that have enriched their lives. Now the editors have curated the Book Review's dynamic 125-year history, which is essentially the story of modern American letters. Brimming with remarkable reportage and photography, this beautiful book collects interesting reviews, never-

Here are the first takes on novels we now consider masterpieces, including a long-forgotten pan of Anne of Green Gables and a rave of Mrs. Dalloway, along with reviews and essays by Langston Hughes, Eudora Welty, James Baldwin, Nora Ephron, and more. Thinking Without a Banister Jan 01 2020 Hannah Arendt was born in Germany in 1906 and lived in America from 1941 until her death in 1975. Thus her life spanned the tumultuous years of the twentieth century, as did her thought. She did not consider herself

a philosopher, though she studied and maintained close relationships with two great philosophers—Karl Jaspers and Martin Heidegger—throughout their lives. She was a thinker, in search not of metaphysical truth but of the meaning of appearances and events. She was a questioner rather than an answerer, and she wrote what she thought, principally to encourage others to think for themselves. Fearless of the consequences of thinking, Arendt found courage woven in each and every strand of human freedom. In 1951 she published *The Origins of Totalitarianism*, in 1958 *The Human*

Condition, in 1961 *Between Past and Future*, in 1963 *On Revolution and Eichmann in Jerusalem*, in 1968 *Men in Dark Times*, in 1970 *On Violence*, in 1972 *Crises of the Republic*, and in 1978, posthumously, *The Life of the Mind*. Starting at the turn of the twenty-first century, Schocken Books has published a series of collections of Arendt's unpublished and uncollected writings, of which *Thinking Without a Banister* is the fifth volume. The title refers to Arendt's description of her experience of thinking, an activity she indulged without any of the traditional

religious, moral, political, or philosophic pillars of support. The book's contents are varied: the essays, lectures, reviews, interviews, speeches, and editorials, taken together, manifest the relentless activity of her mind as well as her character, acquainting the reader with the person Arendt was, and who has hardly yet been appreciated or understood. (Edited and with an introduction by Jerome Kohn) *Judging Statutes* Nov 10 2020 In an ideal world, the laws of Congress--known as federal statutes--would always be clearly worded and easily understood.

judges tasked with interpreting them. But many laws feature ambiguous or even contradictory wording. How, then, should judges divine their meaning? Should they stick only to the text? To what degree, if any, should they consult aids beyond the statutes themselves? Are the purposes of lawmakers in writing law relevant? Some judges, such as Supreme Court Justice Antonin Scalia, believe courts should look to the language of the statute and virtually nothing else. Chief Judge Robert A. Katzmann of the U.S. Court of Appeals for the Second Circuit

respectfully disagrees. In *Judging Statutes*, Katzmann, who is a trained political scientist as well as a judge, argues that our constitutional system charges Congress with enacting laws; therefore, how Congress makes its purposes known through both the laws themselves and reliable accompanying materials should be respected. He looks at how the American government works, including how laws come to be and how various agencies construe legislation. He then explains the judicial process of interpreting and applying these laws through the demonstration of

two interpretative approaches, purposivism (focusing on the purpose of a law) and textualism (focusing solely on the text of the written law). Katzmann draws from his experience to show how this process plays out in the real world, and concludes with some suggestions to promote understanding between the courts and Congress. When courts interpret the laws of Congress, they should be mindful of how Congress actually functions, how lawmakers signal the meaning of statutes, and what those legislators expect of courts construing their laws. The legislative process

BESTSELLER • A powerful memoir of a love that leads two people to find a courageous way to part—and a woman’s struggle to go forward in the face of loss—that “enriches the reader’s life with urgency and gratitude” (The Washington Post) “A pleasure to read . . . Rarely has a memoir about death been so full of life. . . . Bloom has a talent for mixing the prosaic and profound, the slapstick and the serious.”—USA Today ONE OF THE BEST BOOKS OF

THE YEAR: NPR Amy Bloom began to notice changes in her husband, Brian: He retired early from a new job he loved; he withdrew from close friendships; he talked mostly about the past. Suddenly, it seemed there was a glass wall between them, and their long walks and talks stopped. Their world was altered forever when an MRI confirmed what they could no longer ignore: Brian had Alzheimer’s disease. Forced to confront the truth of the diagnosis and its impact on the future he had envisioned, Brian was determined to die on his feet, not live on his knees. Supporting each other in their last

journey together, Brian and Amy made the unimaginably difficult and painful decision to go to Dignitas, an organization based in Switzerland that empowers a person to end their own life with dignity and peace. In this heartbreaking and surprising memoir, Bloom sheds light on a part of life we so often shy away from discussing—its ending. Written in Bloom’s captivating, insightful voice and with her trademark wit and candor, *In Love* is an unforgettable portrait of a beautiful marriage, and a boundary-defying love.

preeminent legal scholars explain what tort law is all about and why it matters, and describe their own view of tort's philosophical basis: civil recourse theory. Tort law is badly misunderstood. In the popular imagination, it is "Robin Hood" law. Law professors, meanwhile, mostly dismiss it as an archaic, inefficient way to compensate victims and incentivize safety precautions. In *Recognizing Wrongs*, John Goldberg and Benjamin Zipursky explain the distinctive and important role that tort law plays in our legal system: it defines injurious wrongs and

provides victims with the power to respond to those wrongs civilly. Tort law rests on a basic and powerful ideal: a person who has been mistreated by another in a manner that the law forbids is entitled to an avenue of civil recourse against the wrongdoer. Through tort law, government fulfills its political obligation to provide this law of wrongs and redress. In *Recognizing Wrongs*, Goldberg and Zipursky systematically explain how their "civil recourse" conception makes sense of tort doctrine and captures the ways in which the law of torts contributes to the maintenance of

a just polity. *Recognizing Wrongs* aims to unseat both the leading philosophical theory of tort law—corrective justice theory—and the approaches favored by the law-and-economics movement. It also sheds new light on central figures of American jurisprudence, including former Supreme Court Justices Oliver Wendell Holmes, Jr., and Benjamin Cardozo. In the process, it addresses hotly contested contemporary issues in the law of damages, defamation, malpractice, mass torts, and products liability.

In a working-class town in a county west of London, a schoolgirl scribbles stories in the back pages of her exercise book, intoxicated by the first sparks of her imagination. As she grows, everything and everyone she encounters become fuel for a burning

talent. The large Russian man in the ancient maroon car who careens around the grocery store where she works as a checkout clerk, and slips her a copy of *Beyond Good and Evil*. The growing heaps of other books in which she loses-and finds-herself. Even the derailing of a friendship, in a devastating violation. The thrill of learning to conjure characters and scenarios in her head is matched by the exhilaration of forging her own way in the world, the two kinds of ingenuity kindling to a brilliant conflagration. Exceeding the extraordinary promise

The Peregrine Oct 22 2021 This extraordinary, poetic portrait of two peregrine falcons is one of the most beloved works of nature writing ever published. From fall to spring, J.A. Baker set out to track the daily comings and goings of a pair of peregrine falcons across the flat fen lands of eastern England. He followed the birds obsessively, observing them in the air and on the ground, in pursuit of their prey,

making a kill, eating, and at rest, activities he describes with an extraordinary fusion of precision and poetry. And as he continued his mysterious private quest, his sense of human self slowly dissolved, to be replaced with the alien and implacable consciousness of a hawk. It is this extraordinary metamorphosis, magical and terrifying, that these beautifully written pages record.
