Finance & Development, December 1978 Aug 01 2022 This paper highlights that the 1978 World Bank Annual Meeting, held in Washington, D.C. during September 25–28, 1978, emphasized that greater efforts need to be made by both developed and developing countries, on domestic as well as international fronts, to stimulate lagging growth and to improve the well-being of the poorest. Just as developing countries agreed that economic takeoff was based as much on their own internal policies as on the external environment, the industrialized nations acknowledged that their own economic well-being was more closely linked to the growth of the Third World.

Video and DVD Industries Jan 02 2020 When the videocassette recorder was launched on the consumer market in the mid-1970s, it transformed home entertainment. Bringing together complementary but also competing interests from the consumer electronics industry and the film, television and other copyright industries, video created a new sector of media business. Two decades later, DVD reinvented video media for the digital age. DVD provided consumers with an innovative form of entertainment technology and almost instantaneously became the catalyst for a huge boom in the video market. Although the VCR and DVD created major markets for video hardware and software, the video business has been continually shaped by industry conflicts and tensions. Repeatedly the video market has become divided when faced with the introduction of competing formats. Easy reproduction of films and other works on cassette or disc made video software a lucrative market for the copyright industries but also intensified struggles to combat the effects of commercial piracy. 'Video and DVD Industries' examines the business of video entertainment and provides the first study looking at DVD from an industrial perspective. Detailing divisions in the video business, the book outlines industry battles over incompatible formats, from the Betamax/VHS war, to competing laserdisc systems, alternatives such as video compact disc or Digital Video Express, and the introduction of HDDVD and Blu-ray high-definition systems. Chapters also look at the formation of international markets in the globalization of video media, the contradictory responses of the Hollywood studios to video and DVD, and the legal and technological measures taken to control industrialized video piracy.

Designing for the Digital Age Jul 20 2021 Whether you're designing consumer electronics, medical devices, enterprise Web apps, or new ways to check out at the supermarket, today's digitally-enabled products and services provide both great opportunities to deliver compelling user experiences and great risks of driving your customers crazy with complicated, confusing technology. Designing successful products and services in the digital age requires a multi-disciplinary team with expertise in interaction design, visual design, industrial design, and other disciplines. It also takes the ability to come up with the big ideas that make a desirable product or service, as well as the skill and perseverance to execute on the thousand small ideas that get your design into the hands of users. It requires expertise in project management, user research, and consensus-building. This comprehensive, full-color volume addresses all of these and more with detailed how-to information, real-life examples, and exercises. Topics include assembling a design team, planning and conducting user research, analyzing your data and turning it into personas, using scenarios to drive requirements definition and design, collaborating in design meetings, evaluating and iterating your design, and documenting finished design in a way that works for engineers and stakeholders alike.

Service Contracts Nov 04 2022 The rules presented in this volume of "Principles of European Law" deal with service contracts. The economic importance of service contracts within the European Union is enormous. The European Commission recently estimated that services account for some 50% of EU GDP and for some 60% of employment in the Union – though an exact figure is hard to determine given that many services are provided by manufacturers of goods. According to the European Commission, many services appear in official statistics as manufacturing activity, meaning that the role of services in the economy is often significantly underestimated.
