Walkable City Jul 25 2019 Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing

exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, **Walkable City** lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

Inside the Painter's Studio Jan 29 2020 Inside an art gallery, it is easy to forget that the paintings there are the end products of a process involving not only creative inspiration, but also plenty of physical and logistical details. It is these "cruder," more mundane aspects of a painter's daily routine that motivated Brooklyn artist Joe Fig to embark almost ten years ago on a highly unorthodox, multilayered exploration of the working life of the professional artist.

Determined to ground his research in the physical world, Fig began constructing a series of diorama-like miniature reproductions of the studios of modern art's most legendary painters, such as Jackson Pollock and Willem de Kooning. A desire for firsthand references led Fig to approach contemporary artists for access to their studios. Armed with a camera and a self-made "Artist's Questionnaire," Fig began a journey through the workspaces of some of today's most exciting contemporary artists.

Part memoir, part manual, part investigative report, The Puppy Diaries continues Abramson's intrepid reporting on all things canine. Along the

Oer Jun 23 2019 For many of us, the drive to affect positive change--however vague or idiosyncratic our sense of this might be--has guided our work in higher education. We champion the pursuit of a college degree because few endeavors can match it in terms of advancing a person's economic mobility (Chetty, Friedman, Saez, Turner, and Yagan; 2017). Despite recent debates about the value of a college degree (Pew Research Center, 2017), the opportunities and financial stability awarded to those with college degrees remain apparent when they are compared to peers who have only graduated high school (Pew Research Center, 2014). And while more Americans have a college degree than ever before (Ryan and Bauman, 2016), access to a formal, post-secondary education continues to be elusive for some. Indeed, over the last ten years, analysts have projected that the cost of attending college would keep 2.4 million low-to-moderate income, college-qualified high school graduates from completing a college degree (Advisory Committee on Student Financial Assistance, 2006). During that same period, college students in the United States saw expenses related to tuition and fees increase by 63 percent, school housing costs (excluding board) increase by 51 percent, textbook prices increase by 88 percent (Bureau of Labor, 2016). Because few students can afford a college education by salary alone, 44.2 million Americans have sought financial aid via student loans. As a result, total student loan debt is now topping \$1.45 trillion in the United States (Board of Governors of the Federal Reserve System, 2017), and student loan delinquency rates are averaging 11.2 percent (Federal Reserve Bank of New York, 2017). The burden of a student's financial decisions extends beyond the mere individual: society will inevitably carry the weight of this debt for years to come.

Truth in Lending Sep 18 2021

Living with Your Body and Other Things You Hate Dec 30 2019 Let's be honest: most people are unhappy with at least some aspect of their physical appearance. Just think of all the money we spend each year trying to improve our looks! But if worrying about your appearance is getting in the way of living, maybe it's time to start thinking about body image in a completely new way. Based in proven-effective acceptance and commitment therapy (ACT), *Living with Your Body and Other Things You Hate* offers a unique approach to addressing your struggle with body image. In this book, you will not be told that your self-perceptions are wrong, that your thoughts are irrational, or that your feelings are misguided. Instead, you will learn to live with the reality that these often painful thoughts and beliefs about yourself will arise from time to time, and that what is really important is accepting these distressing thoughts without allowing them to dominate your life. You know what it's like to constantly be checking the mirror, to avoid certain social situations where your body may be exposed, or to gaze longingly at a fashion model in a magazine and think,

"Why can't I be her?" But what you may not know is that people who struggle with negative body image are at an increased risk for depression, anxiety, eating disorders, and low self-esteem. Body image problems can even lead to major financial issues. By focusing on your appearance and little else, you are hurting yourself in more ways than one. If you are ready to find a purpose in life that is more important than the pain you feel about your appearance, this book provides a truthful, powerful resource. *Calm the Crying Deluxe* Apr 01 2020 This deluxe eBook edition of *Calm the Crying* includes short but clear audio clips of every baby cry described in the book, so you can hear examples of what to listen for. One of the world's foremost parenting experts offers a revolutionary guide for translating a crying baby's urgent messages. Like many new parents, Priscilla Dunstan was at her wit's end trying to ease the crying of her colicky infant son. Then she made a startling discovery: His sounds varied according to his needs, and she could decipher their meaning by tracking the sound as a physical reflex. Unlike learned languages, Dunstan soon realized, every newborn from birth to three months possesses a natural, reflexive communication system for signaling hunger, tiredness, the need to burp, lower gas, and general discomfort. Thirteen years of research culminated in the *Dunstan Baby Language*, now made available to all caregivers in *Calm the Crying*. Helping readers learn to recognize and respond to exactly what their baby needs, Dunstan's remarkable program covers ten sounds in total that can be identified and used to calm a baby. Brimming with diagrams and photographs, *Calm the Crying* reduces the frustration of wasted time spent addressing the wrong needs. A baby's cries are a powerful form of communication—now made even more powerful because the message can be understood loud and clear.
